

EV Charging Guide

CCL CAN PROVIDE AN EV CHARGER FOR EVERY APPLICATION

EVBOX

ELVI

The perfect domestic charger with both single and three-phase variants are available. With charging capabilities of up to 22kW, it could also be used in commercial applications.

BUSINESSLINE

The industry standard in commercial charging.

IQON

The new commercial charger ideal for retail and business charging.

TRONIQ / ULTRONIQ

These super-fast chargers are ideal for service stations along motorways or depots servicing commercial fleets of EVs.

solar edge

SOLAREEDGE HD-WAVE INVERTER WITH EV CHARGING

The solar inverter which allows customers to charge directly from the inverter. The choice for those with an electric car or for those who are still considering upgrading to electric.

myenergi

MYENERGI ZAPPI

The accessible charger that operates like a standard EV charger or can be integrated within a solar system. Single or three-phase, ask about our competitive pricing for your Zappi.

Hub required for OLEV/OZEV & comms

SMA

SMA EV CHARGER

The SMA EV Charger comes in a 7.4 or 22kW power variant and is an easy add-on to new and existing solar systems. In combination with the SMA Sunny Home Manager 2.0 - prioritise your solar generation to charge your car.
